

ASSIGNMENT-2

V.Veera Aishwarya

VV COLLEGE OF ENGINEERING

III-YEAR CSE

(TEAM LEADER)

In the last Assignment you have created index.html and profile.html. So, now in this assignment you have create two html pages and style it using css.

1. Login and Register html page

Task 1: You need to run the html pages in server by using Flask web framework

Task 2: Store the user registration details in IBM DB2

Task 3: while user logging in do the login validation (checking the login credentials is correct or not)

App.py:

The screenshot shows a Visual Studio Code editor window titled "app.py - Login and Registration - Visual Studio Code". The editor displays the following Python code in the "app.py" file:

```
1 from flask import Flask, render_template, request, redirect
2 import ibm_db
3 app = Flask(__name__)
4 conn=ibm_db.connect("DATABASE=bludb;HOSTNAME=54a2f15b-5c0f-46df-8954-7e38e612c2bd.c1ogj3sd0tgtu0lqde00.databases.appdomain.cloud;PORT=32733;SECUR
5 print("connect")
6 # Sample user data stored in memory (replace with a database in a real application)
7 users = []
8 @app.route('/')
9 def home():
10     return 'Welcome to the home page'
11
12 @app.route('/register', methods=['GET', 'POST'])
13 def register():
14     if request.method == 'POST':
15         username = request.form['username']
16         password = request.form['password']
17         # You can add validation and error handling here
18
19         # Store the user data (replace with database insertion in a real application)
20         users.append({'username': username, 'password': password})
21
22         return redirect('/login')
23
24     return render_template('register.html')
25
26 @app.route('/login', methods=['GET', 'POST'])
27 def login():
28     if request.method == 'POST':
29         username = request.form['username']
30         password = request.form['password']
31         # You can add validation and error handling here
32
33         # Check if the user exists (replace with database query in a real application)
```

The status bar at the bottom indicates the file is at "Ln 7, Col 11", uses "Spaces: 4", "UTF-8" encoding, "CRLF" line endings, and is a "Python 3.11.3 64-bit" file. The system tray shows a temperature of 34°C and the date/time as 11:31 AM on 5/14/2023.

This close-up screenshot shows the "register" function in the "app.py" file. The code is as follows:

```
20         users.append({'username': username, 'password': password})
21
22         return redirect('/login')
```

```
23     return render_template('register.html')
24
25
26 @app.route('/login', methods=['GET', 'POST'])
27 def login():
28     if request.method == 'POST':
29         username = request.form['username']
30         password = request.form['password']
31         # You can add validation and error handling here
32
33         # Check if the user exists (replace with database query in a real application)
34         for user in users:
35             if user['username'] == username and user['password'] == password:
36                 return f'Welcome, {username}!'
37
38         # Redirect to login page with an error message if authentication fails
39         return render_template('login.html', error='Invalid username or password')
40
41     return render_template('login.html')
42
43 if __name__ == '__main__':
44     app.run(debug=True)
45
```

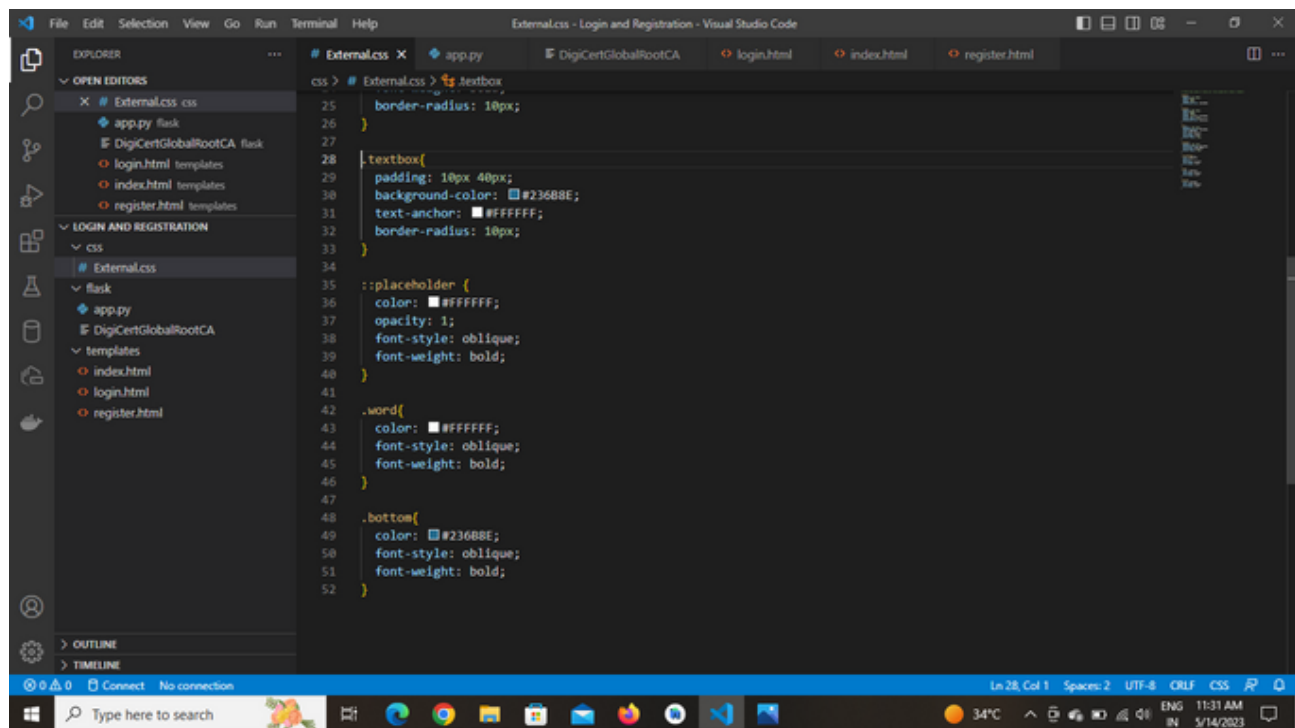

Ln 7, Col 11 Spaces: 4 UTF-8 CRLF Python 3.11.3 64-bit

```

Login page:

The login page features a light blue background. At the top, a dark blue rectangular box contains the word "Login" in a white, italicized serif font. Below this, there are three input fields: the first is labeled "Enter Your Username", the second "Enter Your Password", and the third "Sign In". All labels are in a small, italicized serif font. At the bottom of the form, there is a link that reads "Don't have an account? [Sign Up here](#)".

Registration page:

The registration page has a light blue background. A dark blue rectangular box at the top contains the word "Register" in a white, italicized serif font. Below this, there are three input fields: the first is labeled "Enter Your Username", the second "Enter Your Password", and the third "Enter Your Email ID". All labels are in a small, italicized serif font.
